All right you newbies, are you ready to learn how to chat online?

ODE TO
CYBER BULLYING

Cyberbullying

- Research shows that almost one in four students between the ages of 11 and 19 have been the victim of cyberbullying.
- Cyberbullying has the same insidious effects as any kind of bullying, turning children away from school, friendships, and in tragic instances, life itself.
- Any type of bullying is not harmless. In some cases, it can even be a criminal offense. Most victims, suffer shame, embarrassment, anger, depression and withdrawal, but in extreme incidents, cyberbullying has led kids to suicide.
- The best weapon, is awareness. If you feel that you can talk about the problem, that your parents, your teachers and your friends understand the problem, then cyberbullying will come out of the mobile phone inboxes and out of the computers, and into the open.

Cyberbullying - advice

- Save all messages - they can be used as evidence
- Capture screen dumps of messages

Warning signs

- Unexpected changes in behaviour or mood eg reluctant to talk, depressed
- Isolation
- School avoidance
- Changes in the way they use technology (computer/phone)
